برای کمتر کردن اثر اصل عدم قطعیت هایسنبرگ ،میتوان هر سیگنال را با یک نگاه دیگری بنام Multi resolution analyze(MRA) تحلیل کرد.

در این روش سیگنال را در باند های فرکانسی مختلف با رزولوشن های متفاوت بررسی میکنیم ؛بدین صورت که در فرکانس های بالا به دنبال رزولوشن زمانی خوب و در فرکانس های پائین به دنبال رزولوشن فرکانسی خوب هستیم.

این روش زمانی مفید است که سیگنال مورد بررسی در بازه های کوتاه، دارای اجزاء با فرکانس بالا و در بازه های طولانی تر دارای اجزاء با فرکانس پایین تر باشد.

سیگنال ها بیولوژیکی غالبا دارای چنین ویژگی هایی هستند.
